SUMMARY

Backend engineer with production experience in core banking, now building toward AI agent and platform infrastructure. Built and maintained services in Java, Python and SQL for a platform used by 60+ financial institutions across Latin America, and ships self-directed systems: a self-hosted control plane and an agent-verification tool published for AI coding agents. English C2, remote-first.

SKILLS

- **Languages:** Java, Python, TypeScript, JavaScript, SQL (Oracle PL/SQL, PostgreSQL)
- **Backend:** Node.js, Express, REST and SOAP APIs, microservices, concurrency, observability, Drizzle ORM
- **Data and cloud:** PostgreSQL, Oracle SQL, SQLite, Supabase, GCP (Cloud Run, Cloud SQL, IAM), AWS, Docker, CI/CD, Git, Linux
- **Frontend and testing:** React, React Native, Vite, Tailwind; JUnit, PyTest, unit and integration tests, code reviews, security audits

EXPERIENCE

Bantotal – Software Development Analyst Apr 2025 – Aug 2026
Montevideo, Uruguay (Hybrid)

- Built and maintained backend services across core banking modules in a multi-language stack (Java, Oracle PL/SQL, GeneXus) for a platform used by 60+ financial institutions across Latin America.
- Resolved 50+ issues through incident triage and root-cause analysis, improving reliability and logging across SOAP/REST integrations.
- Selected by supervisors for the company's newest project in under one year in the role.

PROJECTS

Hostkind – open-source, self-hosted control plane *Node.js, React, WebSocket, SQLite, Electron*
Control plane for game servers and long-running processes: process supervision, live WebSocket consoles, health metrics, backups, schedules, users, roles and an audit trail in a single Node.js process with crash-recovery state in SQLite. AGPL-3.0.

Gauntlet – open-source agent-verification skill *Agent Skills format, MIT*
Independent builder-critic loops for AI coding agents: work runs against a concrete quality bar with fresh-context critics, the builder cannot approve its own work, and a pass requires a fresh critic verdict. Published for Claude Code, Codex and OpenCode via npx skills.

Cleta – bike-sharing platform *React Native, Node.js, PostgreSQL, GCP, Docker*
Mobile app, web admin panel and a backend integrating Allegion smart locks over BLE for the UTEC Fray Bentos campus.

Falta Uno – football pickup-match organizer *React 19, TypeScript, Express, Drizzle ORM*
Built solo: ELO rating engine, team-balancing algorithm, vote-consensus state machine, security audit and unit plus integration tests.

EDUCATION

UTEC – Universidad Tecnológica del Uruguay Mar 2021 – Dec 2025
Licenciatura (B.Sc.) in Information Technology

Karelia University of Applied Sciences Aug 2023 – Jan 2024
Exchange Student, Information Technology
